Inspiring Communities Together

Adanu's mission is to ignite the passion of Ghana communities and bring about a future filled with opportunity and hope.

**Adanu is excited to offer a volunteer trip to Ghana
March 24 – April 1, 2017**

OUR TRIPS

Adanu works in villages that have asked us to collaborate with them, to bring about a brighter future.

With Adanu, you will gain unique insight into our local NGO and local village life. Adanu has been leading volunteer trips since 2002, successfully hosting over 1500 people from around the world.

Empower and motivate the community of Hehekpoe as you build their new school together. Light construction work will be done with no experience necessary. We will work with teachers and students during classes, take part in their lunch program with school-grown vegetables, and help in the library. With your hands-on help on the project, in classrooms and the library, you will make an impact that will last for lifetimes.

OUR MODEL

Adanu partners with communities to help their hopes for their future become reality. Our goal is to understand the needs of the village, then collaboratively create a plan for how they can build the structure using their own materials and labor. Whatever they cannot contribute, other stakeholders – INCLUDING YOU! – donate.

YOUR ENGAGEMENT

We will visit several villages so you can see various projects and efforts that the communities and Adanu are making. You are likely to meet with Elder Councils, teachers and key officials to learn about their challenges and successes.

Throughout the trip you will have the opportunity to visit beautiful areas in the Volta Region, take part in fun activities such as a local open-air market adventure, cooking local cuisine with a family, pottery making and more.

Ignite. Collaborate. Empower.

Join us and make a difference!

WHO

Adanu and You

Adanu has hosted over 1500 volunteers from around the world since 2002. Your health, safety and security are paramount to us, so an Adanu member will be with you throughout your trip, and our dedicated cook will prepare the meals.

WHAT

Community-Led Projects

Adanu creates a framework of accountability, ownership and positive action. Projects are truly community-led, and all volunteer interactions are grounded in respect and integrity. The community opens its arms to our volunteers based on trust, built over months and years.

WHY

Empowerment & Hope

Children and adults in the communities say how important volunteers are in shaping their world view. That YOU are willing to use your energy to visit and help them brings a strong sense of hope and empowerment.
